

CONTACT LENS EXAMINATION POLICY:

A Contact Lens Service Fee is charged to the patient on an annual basis. This fee is generally not covered by vision plans or medical insurance. This fee is for services and diagnostic lenses (if applicable) only and does not include contact lens supplies.

Contact lenses are medical devices which require ongoing evaluation to ensure safe and comfortable wear. This service is in addition to your annual comprehensive examination and includes:

- Evaluation of current, or new lens, fit on the eye.
- Evaluation of corneal, conjunctival and eyelid health as related to contact lens wear.
- Mapping of corneal surface and evaluation of changes compared to baseline mapping.
- Progress checks related to changes in contact lens prescription or material for 60 days following evaluation and/or fitting of new contact lenses.
 - New contact lens wearers will have to return for a minimum of one progress check.
 - Previous contact lens wearers may be asked to return for a progress check if there are changes made to prescription or material to ensure satisfaction with comfort and vision, as well as to assess fit for any additional changes that may need to be made.
 - Contact lenses should be worn for a minimum of an hour prior to any progress check to allow the lens to properly settle on the eye.

Our contact lens service fees are as follows:

Annual Evaluation of Contact Lens	\$80
● This service is for contact lens wearers fit in a standard spherical design contact lens.	
Annual Evaluation of Advanced Contact Lens Designs	\$100
● This service is for contact lens wearers fit in a toric (astigmatism), multifocal (presbyopic), or monovision lenses.	
Annual Evaluation of Rigid Gas Permeable Lens	\$150
● This service is for contact lens wearers fit in a rigid gas permeable contact lens.	
Fitting of Medically Necessary Contact Lenses	varies by design

I have read the above and understand the following:

- Payment for contact lens services is due at the time of service. It is generally considered a non-covered, cosmetic service by vision plans and medical insurance.
- The global follow up period for progress checks and finalizing a contact lens prescription is 60 days. After 60 days a \$35 for a contact lens progress check may apply.
- A new comprehensive examination and contact lens evaluation will be required after 6 months for any changes to be made.
- A new contact lens wearer who is unable to complete the fitting or insertion and removal training the same day and opts to discontinue the fitting process is responsible for 50% of the above charges.

I consent to the above charges and wish to be fit into contact lenses today.
